BUREAU OF THE CENSUS

The publications
from the 1982 Economic and
Agriculture Censuses are dedicated
to the memory of Shirley Kallek,
Associate Director for Economic Fields.
During her career at the Bureau of the
Census (1955 to 1983), she continually
directed efforts to improve
the timeliness and accuracy of
economic statistics.

1982 Census of Agriculture

BUREAU OF THE CENSUS
C.L. Kincannon, Deputy Director

Charles A. Waite, Associate Director
for Economic Fields
Michael G. Farrell, Assistant Director for
Economic and Agriculture Censuses

AGRICULTURE DIVISION
John H. Berry, Chief

ACKNOWLEDGMENTS—Many persons participated in conducting the 1982 Census of Agriculture. Primary direction was by **Shirley Kallek,** Associate Director for Economic Fields (to May 1983), **Charles A. Waite,** her successor, and **Michael G. Farrell,** Assistant Director for Economic and Agriculture Censuses.

This report was prepared in the Agriculture Division under the general supervision of **Arnold L. Bollenbacher,** Chief (to June 1982) and **John H. Berry,** Chief (from July 1982).

The report form content was prepared by the Outlying Areas Branch of the Agriculture Division, Bureau of the Census, in cooperation with the Department of Commerce of Guam.

The census data were collected under the direction of the Governor of Guam, the Honorable **Ricardo J. Bordallo.** The actual collection of the data was carried out by census enumerators under the supervision of **Joseph T. Flores,** Project Leader. Clerical processing was performed in the Guam central processing office.

Many census divisions contributed to this report. Administrative Services provided the forms design and other administrative services; Publications Services contributed in publication planning and design, editorial review, composition, and printing procurement; Geography provided the maps; and Computer Services provided the computer processing facilities.

Special tribute is paid to the many farm and ranch operators who furnished the information requested. Only through their cooperation was it possible to collect and publish the data in this report.

Library of Congress Cataloging in Publication Data

Main entry under title:

1982 census of agriculture.

"October 1983."
Includes indexes.

HISTORY

The 1982 census is the 10th census of agriculture of Guam. The first agriculture census was taken in 1920 as part of the decennial census, a practice that continued every 10 years through 1960. The 1964 Census of Agriculture was the first quinquennial (5-year) census to be taken in Guam. In 1976, Congress authorized the census of agriculture to be taken for 1978 and 1982 to adjust the data reference year to coincide with the 1982 Economic Censuses. After 1982, the agriculture census will revert to a 5-year cycle and be taken covering years ending in "2" and "7".

USES OF THE CENSUS

This information is needed by the farmers, their representatives, the government, and many other groups of people who are concerned with food and agricultural production in Guam.

The census provides a comprehensive inventory of farms and their production. A great many uses are made of this basic census information.

For example:

a. Agricultural programs can be evaluated and new programs started on the basis of farm statistics.
b. Monies allocated by the Federal Government are based in part on census data.
c. Businesses can determine where and how much of their products they can sell, and measure other features of their markets.
d. Farmers can compare their current size and performance with the size and performance of other farms in the same geographic area to determine how well they are doing.

Census figures are fundamental to making sound economic decisions and help increase the competition that provides better prices for goods and better services to the farmers.

AUTHORITY AND AREA COVERED

The 1982 Census of Agriculture was taken in accordance with the provisions of title 13, United States Code. Sections 142(a) and 191 provide for a census of agriculture every 5 years in each State, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands of the United States. The census data for Guam may be collected by the Governor or a representative from his/her staff to act as census supervisor in accordance with a Memorandum of Agreement prescribed or approved by the Director of the Bureau of the Census.

FARM DEFINITION

The statistics presented in this report relate to places qualifying as farms for census purposes. For the 1982 Census of Agriculture in Guam, a farm was defined as a place on which any crop, vegetable, or fruit was harvested or gathered during 1982, or on which there was any livestock or 15 or more poultry at the time of enumeration. The same definition was used in 1978.

Appendix A includes an explanation on taking the census and office processing.

COMPARABILITY OF DATA

Comparability of data from the 1982 Census of Agriculture in Guam has been slightly affected by improvements in the coverage of the operators' list and improved techniques of training enumerators. In general, data are comparable with that of previous censuses.

TABULAR PRESENTATION

Island data—Tables 1 through 9 show detailed island level data usually accompanied by historical data for one or more censuses. Tables 26 and 27 provide 1982 island data cross tabulated by size of farm and tenure of operator.

Election Districts data—Selected data items are presented by Election Districts in tables 10 through 25, which include general data for all districts. The Election Districts are listed in alphabetical order in the table stub.

CENSUS DISCLOSURE RULES

In keeping with the provisions of title 13, United States Code, no data are published that would disclose the operations of an individual farm. However, the number of farms in a given size category or other classification is not con-

sidered a disclosure, so this information may be given even though other information is withheld.

DEFINITIONS AND EXPLANATIONS

Definitions and a general explanation of terms used are shown in appendix A. The 1982 report form is shown in appendix B.

DOLLAR VALUES

All dollar values presented in this report are expressed in current dollars, i.e., 1982 data are expressed in 1982 dollars and 1978 data in 1978 dollars. The dollar values have not been adjusted for changes in price levels between census years.

INVENTORIES, PRODUCTION, AND SALES DATA

Inventories of livestock and poultry are as of the day of enumeration. Crop and livestock production, sales, and expense data are for the calendar year.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used throughout the tables:

—	Represents zero.
(D)	Withheld to avoid disclosing data for individual farms.
(X)	Not applicable.
(Z)	Less than half of the unit shown.
(NA)	Not available.

TAKING THE CENSUS A-1
OFFICE PROCESSING A-1
DEFINITIONS AND EXPLANATIONS A-2
FARM CLASSIFICATIONS A-4

TAKING THE CENSUS

Report Form

The report form for the 1982 Census of Agriculture in Guam was prepared by the Outlying Areas Branch of the Agriculture Division, Bureau of the Census, in cooperation with the Department of Commerce of Guam.

The content of the 1982 census report form is similar to that of the 1978 form. Some changes were made to provide more meaningful and useful statistics, and to facilitate the processing of the collected data. A new data item was added for total acres in the Fruits and Nuts section. A data item not included was on source of financing.

There were two other changes made to the report form. The Fishery section was changed to make it more understandable; and the reporting unit for land area was changed from hectares to acres to facilitate reporting by respondents.

Training Program

The project manager, crew leaders, and enumerators employed for the census in Guam received special training for the job in accordance with instructions prepared by the Bureau of the Census. The training included classroom practice in interviewing and filling out the report form and a detailed discussion of the enumerators' instructions.

Method of Enumeration

The statistics in this report represent totals of data collected from farm operators during a 12-week period, beginning in March 1983. Prior to enumeration, Guam was divided into 19 Enumeration Districts (ED's) and each district was clearly delineated on special ED maps.

Each enumerator was assigned an ED and furnished with a map of the district to be enumerated. In all areas, except cities and other heavily populated areas, enumerators were required to visit each dwelling (or place), list the name of the head of household, and ask a series of screening questions. If the place qualified as an agricultural operation, the enumerator was required to complete a report form (see appendix B). For urban and other heavily populated areas, enumerators were given a list of 1978 farm operations and were required to enumerate those that still operated as a farm. To ensure as complete an enumeration as possible, the enumerators were required to plot the location of each occupied dwelling or place on the ED map. They were also given lists of special and large farms located in each ED and were required to complete a report form for each name listed or an explanation of why one was not necessary.

Enumerators were to ask enough questions about tracts of land on which there were no dwellings to determine whether a report form should be completed for the owner or person in charge. This procedure was designed to ensure complete coverage of all land used, whether operated by an individual, partnership, corporation, or institution.

To avoid duplication or overlapping of enumeration, rules were established whereby responsibility for coverage could be determined. If a place was entirely within the boundaries of an ED, the enumerator assigned to it was responsible for completing the report form, regardless of where the operator lived. If a place was partly in one ED and partly in another, the enumerator assigned to the ED in which the operator lived was responsible for completing the report form; including all land the person operated in Guam regardless of ED.

OFFICE PROCESSING

The office processing was done in the Agriculture Division at the Bureau of the Census. Each report form was edited and coded prior to being keyed and tabulated. Report forms obtained for places not meeting the census farm definition criteria were voided and removed from further processing. The remaining report forms were examined for accuracy, consistency, and completeness. Errors in computations and in units of measures, inconsistencies, and misplaced entries were corrected. Incomplete reports were adjusted on the basis of related information on the same form or on report forms for nearby farms of similar type and size.

After all report forms had been reviewed, the data were encoded onto magnetic tape and subjected to a thorough computer edit analysis. The computer analyzed the data for each farm for completeness and consistency and recorded all inconsistencies. These inconsistencies were reviewed by subject matter specialists and corrected and encoded onto the magnetic tape. The corrected data were then tabulated by the computer and printed out for review. Following necessary corrections, the data were retabulated and a printout was provided so that the data tables could be prepared for final publication.

DEFINITIONS AND EXPLANATIONS

The following definitions and explanations provide a more detailed description of terms used in this publication than are available in the tables or on the report form. For an exact wording of the questions on the 1982 report form, see appendix B.

In the tables, data for land in farms, land use, fruit and nut trees, and livestock and poultry on hand represent the situation existing at the time of enumeration of each farm. The enumeration for the 1982 Census of Agriculture began in March 1983, the 1978 census in April 1978, and the 1974 census in January 1975. All other data, such as that relating to acres, production, sales, hired workers, and expenses are for the calendar years 1982, 1977, and 1974, respectively.

Farms or farms reporting—Figures for "farms" represent the number of farms for which the specified item was reported. The difference between the total number of farms and the number of farms reporting an item represents the number of farms not producing that item, provided a correct report was received for all farms.

Land in farms—The land in farms was determined from the answers to questions 1 through 7 in section 2 of the report form (see appendix B). The amounts of land reported as owned, rented from others, used under permit, occupied without permit, or furnished by the government were added together, and the amount of land reported as rented to others was subtracted from that sum. The result represents "land in farms." Although the area designated land in farms consists primarily of agricultural land—i.e., land used for crops, pasture, or grazing—it also included areas of land not actually under cultivation nor used for pasture or grazing. For example, woodland and wasteland owned or rented from others were included as land in farms unless the report indicated they were being held for nonagricultural purposes, such as recreational, for timber, etc.

Land owned—This item includes all land held by the operator or his/her spouse under title, purchase contract, homestead law, or as heir or trustee of an undivided estate at the time of enumeration. However, land used by the U.S. military services was excluded even though owned by the operator.

Land rented to others—This item includes all land the operator rented or leased to others and all land assigned to others on shares or rent free during the past year. For the most part, the land rented to others represents agricultural land, but it may also include land rented for residential or other purposes. The tenant is considered to be the operator of land leased, rented, or worked on shares, even though the landlord may supervise the operations. The landlord is considered to be the operator of only that portion of the land not assigned to tenants.

Land rented from others—This item includes not only land that the operator rented or leased from others, but also land worked on shares for others and land occupied rent free.

Land occupied by permit—This item includes all land for which the operator had a Government of Guam permit. Rights to use land owned or controlled by the Government of Guam are in the form of permits rather than lease or rental arrangements.

Land occupied without permit—This item includes all land occupied by the operator as a "borrower" or "nonpermittee," without ownership rights to the land, or without any kind of permit, lease, or rental agreement.

Land furnished by the Government—This item includes all land that the Government of Guam furnished to the operator in connection with his/her living quarters.

Land use—Land in farms is categorized according to the way it was being used on enumeration day. The land uses described in the following paragraphs are mutually exclusive in that each acre of land is counted only once, even though it may have had more than one use during the year.

Cropland used for crops—This item includes all land planted in crops at the time of enumeration. Land was to be reported only once, even if two or more crops were planted on it. Land in crops includes (1) land in bearing and nonbearing fruit and nut trees or plants or any other tree crops, (2) land that had partial but not total crop failure, and (3) land in home gardens.

Cropland used for pasture—This item includes all cropland on the place that was used only for pasture. Land planted in crops, even though the crops were not to be harvested, was not to be included here.

Cropland not used for crops or pasture—This item includes cropland on the place that was not used for crops or pasture. It does not include land so hilly, rocky, or wet that the cost of improving it for cultivation would be more than the operator could pay. Nor does it include land in roads, streams, or swamps. It does include land on which there was total crop failure due to flood, drought, insects, fire, or other causes; cropland lying idle; and cropland planted with soil-improvement grasses, or other cover crops planted for the purpose of improvement.

Pastureland used for pasture or grazing—This item includes land used for grazing livestock at the time of enumeration. It does not include cropland, even though cattle or other livestock may have been grazed on it.

Pastureland not used for pasture or grazing—This item refers to all land suitable for pasture or grazing that was not being used for grazing livestock at the time of enumeration. It includes land that, in the opinion of the operator, could have supported enough plant growth, either native or planted for grazing, provided the clearing and grazing of the land would not seriously damage it.

All other land—This item includes all land not qualifying as either cropland or pastureland as defined above. It includes land in house lots, barn lots, ponds, ditches, swamps, steep slopes, roads, brushland, wasteland, and forest areas.

Crops harvested—The report form contained individual inquiries for crops commonly grown and space to write in those less frequently produced. The information requested in 1982 includes acres of crops harvested, pounds harvested and sold, and value of sales.

Vegetables and field crops—The number of acres harvested, the total quantity of each vegetable and field crop harvested, the quantity sold, and value of sales during 1982 were to have been reported.

When two or more crops, or two or more plantings of the same crop were harvested from the same land during the year, the area was to be reported separately for each crop or planting.

Fruits and nuts—For fruits grown on farms, information was obtained on the total acres, total quantity harvested, the quantity sold, and the value of sales during the year. Data were also collected separately for the number of trees or plants, both bearing and nonbearing, that were on the place on enumeration day. For breadfruits, betelnuts, coconuts, guavas, soursops, starfruits, and other wild or cultivated fruits, nuts, or crops, the reported data represent total quantities harvested or gathered during the year by all members of the operator's household, both from land on the farm and other land.

Data for nursery and ornamental plants, flowering trees and plants, and shrubs reflect the number of plants on hand at time of enumeration. Plants sold and value of sales were for calendar year 1982.

Farm operator—The term "operator" designates a person who operates a farm, either by doing the work himself/herself or by directly supervising the work. The operator may be the owner, a member of the owner's household, a tenant or renter, the manager, or the person in charge of an institutional farm. By definition, the number of operators is the same as the number of farms.

Operator characteristics—Data were obtained to classify the operators according to five characteristics.

Residence of operator—Farm operators were classified by residence according to whether or not they lived on the farms they were operating. Some of those who did not live on the farms they operated lived on farms operated by others. If all the land was rented from others or worked on shares for others, the operator was considered to live on the farm operated if the dwelling was included in the rental agreement. In such cases, the dwelling was not necessarily on the farm operated. Similarly, an operator who did not live on the land being cultivated, but who had some agricultural operations (other than a home garden) at his/her dwelling, was considered to be living on the farm operated.

Year began operating present farm—Enumerators were instructed to obtain the year an operator began to operate the farm, i.e., the first year the operator took continuous charge of the present farm or any part of it.

Age of operator—Operators were classified by age into six groups. The average age was obtained by dividing the sum of the ages of all operators reported by the number reported.

Main occupation—This question was asked to determine whether the principal occupation of the operator was agricultural or nonagricultural. If the operator devoted 50 percent or more of his/her work time to agricultural activities, his/her main occupation was considered to be agriculture.

Work off farm—Data for work off farm have been collected since 1969. It was enumerated to provide information on the extent of part-time farming in Guam. Operators reporting off-farm work in 1982 varied from those who worked full time for the military installations to those who supplemented their income with odd or spare time jobs.

Only work by the operator for pay was to be reported. Days worked off the place were to include work at another farm or a nonfarm business, such as a store or repair shop; or at a profession such as doctor, lawyer, or teacher. Exchange work was not to be reported.

Type of holding—Agricultural operations are classified on the basis of whether they are producing mainly for home consumption, or mainly for sale. Holdings producing principally for sale are further classified by type of agricultural production.

Holdings with production mainly for home consumption—This type applies to holdings from which more than 50 percent of the agricultural output of the holding is consumed by the holder's household.

Holdings with production mainly for sale—This type applies to holdings where 50 percent or more of the agricultural output is for sale. Holdings producing mainly for sale are further classified according to their most important activity.

Vegetable holding is one on which 50 percent or more of the value of sales was from the sale of vegetables.

Field crop holding is one on which 50 percent or more of the value of sales was from the sale of field crops.

Fruit and nut holding is one on which 50 percent or more of the value of sales was from the sale of fruits and nuts.

Dairy holding is one on which 50 percent or more of the value of sales was from the sale of dairy products.

Livestock holding is one on which 50 percent or more of the value of sales was from the sale of livestock and livestock products, except dairy products.

Poultry holding is one on which 50 percent or more of the value of sales was from the sale of poultry and poultry products.

Mixed holding is one on which no item accounts for 50 percent or more of the value of sales.

Other holding is one that does not belong to any of the previous groups.

Selected production expenses—Information was obtained for six major categories of farm expenses incurred during 1982.

Machine hire and customwork—This item pertains to farm-related expenses for tractor hire, plowing, spraying, hauling, etc.

Wages and salaries paid for farm workers—This item pertains to cash payments for agricultural work. Expenses incurred from housework or contract construction work were not to be included.

Purchases of feed for livestock and poultry—This item includes money spent for the purchase of feed for livestock and poultry.

Purchases of insecticides, fungicides, and herbicides—This item includes money spent for chemicals, sprays, dusts, etc., used for the control of weeds, pests, insects, diseases, etc., for all crops, livestock, and poultry.

Purchases of fertilizers and manure—This item covers payments for commercial fertilizers, fertilizing materials, and manure.

Purchases of livestock and poultry—This item covers money spent for the purchase of livestock and poultry.

Livestock, poultry, and fish—Data for livestock and poultry show the number on hand at time of enumeration and quantity sold during 1982. All livestock and poultry on the place were enumerated at the time of the enumeration regardless of ownership.

Sales data were collected for all livestock and poultry sold from the place during 1982, as well as dozens of eggs and quarts of milk sold.

Data for pounds of fish caught, pounds of fish sold, and value of sales are for calendar year 1982.

Cattle and calves—Includes "milk cows" that were on the place on the day of enumeration and were milked at any time during 1982. "All others" refers to cattle and calves other than milk cows. Livestock sales data are for the calendar year 1982.

Equipment—The following types of equipment on the place at time of enumeration regardless of ownership, were reported so long as they were operable.

Tractors—This includes all wheel and tracklaying (crawler) tractors, garden tractors, and homemade tractors.

Motortrucks—This includes pickup trucks and truck-trailer combinations, and jeeps and station wagons, if used primarily as trucks.

Automobiles—This includes jeeps and station wagons used primarily as passenger cars.

Facilities—The presence or absence of electricity and/or piped running water on the place was reported.

Electricity—This covers electrical power anywhere on the place including the dwelling of the operator.

Piped running water—This covers water in pipelines by a pressure system or by gravity flow from natural or artificial sources. Water from a hand pump was not considered to be piped running water.

FARM CLASSIFICATIONS

Tables 26 and 27 present detailed data for farms classified by size of farm and tenure of operator.

Farms by size—Farms were classified by size on the basis of the total land area established in each one. According to the census definition, a farm is essentially an operating unit, not an ownership tract. All land operated or managed by one person or partnership represents one farm. In the case of share-tenants, the land assigned to each share-tenant is considered a separate farm, even though the landlord may consider his/her entire landholding to be one unit rather than several separate units.

Farms by tenure of operator—Farms were classified by tenure of operator on the basis of information reported for land owned, rented from others, operated under a government permit, operated without a permit (nonpermittee), or furnished by the Government of Guam in connection with the operator's living quarters. During the processing operations, each report form was coded to indicate whether the operator was a full owner, part owner, tenant, permittee, nonpermittee, or other operator.

Full owners—These operate only land owned or land owned plus land operated under a permit, without a permit, or in connection with living quarters furnished by the Government of Guam.

Part owners—These operate land owned plus land rented from others. They may also operate land under

a permit, without a permit, or furnished by the Government of Guam in connection with their living quarters.

Tenants — These operate only land rented from others or land rented plus land under a permit, without a permit, or furnished by the Government of Guam in connection with their living quarters.

Permittees — They operate land under a permit from the Government of Guam, or they may operate some of the land under a permit and the remainder of the land without a permit.

Nonpermittees — These operate "borrowed" land. They do not own or rent the land, operate the land under a permit, or use the land under any arrangement with the Government of Guam.

Others — These operate land that does not meet the criteria of the preceding groups. All the land they operate is furnished by the Government of Guam in connection with living quarters, or part is operated without a permit and part is furnished by the Government of Guam in connection with living quarters.

	None	Number of plants on the place (a)	Number of plants sold (b)	What was the value of sales in 1982? (c)
41. Nursery and Ornamental plants, flowering trees and plants, shrubs, etc.; on the place in the last 12 months	☐	233	234	235

FORM 82 A11(G) (12-30-82)

Section 4 LAND USE

Of the total acres on this place *(Section 2, item 7)* —

	None	Acres	Tenths
1. How many acres of land are in crops?	☐	236	/10
2. How much cropland is used for pasture?	☐	238	/10
3. How much cropland is not used for crops or pasture?	☐	240	/10
4. How much pastureland is used for pasture or grazing?	☐	242	/10
5. How much pastureland is not used for pasture or grazing?	☐	244	/10
6. How many acres are in other land?	☐	246	/10
7. TOTAL LAND *(Add entries in items 1 through 6. The total should be equal to the entry in section 2, item 7.)* →		248	/10

Section 5 LIVESTOCK AND POULTRY

Do you or anyone else have any of the following livestock and poultry on this place or were any sold from this place in 1982?

	None	How many are on this place today? (a)	How many were sold in 1982? (b)	What was the value of sales in 1982? (c)
1. Carabaos of all ages	☐	250	251	252
2. Total cattle and calves of all ages *(Must equal sum of a and b below.)*	☐	253	254	255
a. Milk cows	☐	256	257	258
b. All other cattle and calves	☐	259	260	261
3. Hogs and pigs of all ages	☐	262	263	264
4. Goats and kids of all ages	☐	265	266	267
5. Horses and colts of all ages	☐	268	269	270
6. Chicken hens 4 months old and over *(Must equal sum of a and b below.)*	☐	271	272	273
a. Commercial layers	☐	274	275	276
b. Other chicken hens	☐	277	278	279
7. Chickens less than 4 months old	☐	280	281	282
8. Roosters and pullets	☐	283	284	285
9. Other poultry		286	287	288
a. Ducks	☐	289	290	291
b. Geese	☐	295	296	297
c. Pigeons	☐	298	299	300
d. Other — *Specify* _____	☐			

	None	Number sold in 1982 (a)	What was the value of sales in 1982? (b)
10. How many dozens of chicken eggs were sold during 1982?	☐	301 Dozens	302
11. How many quarts of milk were sold during 1982?	☐	303 Quarts	304

Section 6 FISHERY

	None	Total pounds caught (a)	Total pounds sold (b)	Value of sales in 1982 (c)
1. How many pounds of fish were caught during 1982?	☐	305	306	307

FORM 82 A1(G) (12-30-82)

Section 7 SELECTED EXPENDITURES IN 1982

How much did you spend for each of the following in 1982?	None	Dollars only
1. Machine hire and customwork	☐	309
2. Wages and salaries paid to employees or hired farm workers *(Do not include housework or contract construction work. Include cash payments only.)*	☐	310
3. Feed purchased for livestock and poultry *(Include cost of grain, feed, concentrates, and roughages; also amount paid for grinding and mixing feed.)*	☐	311
4. Insecticides, fungicides, and herbicides	☐	312
5. Fertilizers and manure purchased	☐	313
6. Livestock and poultry purchasad	☐	314

Section 8 EQUIPMENT AND FACILITIES USED ON THE PLACE IN 1982

1. How many of the following are on this place? *(Include all specified equipment on this place today, regardless of ownership, provided it is in operating condition.)*	None	Number
a. Tractor (of all kinds)	☐	315
b. Motortrucks	☐	316
c. Automobiles	☐	317

2. Do you have the following on this place?

a. Electricity 318 — 1 ☐ Yes 2 ☐ No

b. Piped running water 319 — 1 ☐ Yes 2 ☐ No

Section 9 OPERATOR CHARACTERISTICS

The following questions are about the FARM OPERATOR.

1. Do you live on this place? 320 — 1 ☐ Yes 2 ☐ No

2. In what year did you begin to operate this place? 321 — _____ Year

3. How old were you on your last birthday? 322 — _____ Years old

4. What is your main occupation? 323 — 1 ☐ Agricultural 2 ☐ Non-agricultural

5. OFF FARM WORK — How many days did the operator work 4 hours or more off this place in 1982? *Include work at a nonfarm job, business, or on someone else's farm. Exclude exchange farm work* 324 — 1 ☐ None 2 ☐ 1—49 days 3 ☐ 50—99 days 4 ☐ 100—149 days 5 ☐ 150—199 days 6 ☐ 200 days or more

Section 10 ENUMERATOR'S RECORD (To be filled by the Census enumerator)

1. Who furnished the information in this report? 325 — 1 ☐ Operator 2 ☐ Landlord 3 ☐ Hired laborer 4 ☐ Wife or member of the operator's family 5 ☐ Other — *Specify* _____

2. **Remarks** *(Make any remarks needed in regard to the place, the owner or operator, the crops cultivated, or the livestock on this place.)*

3. Residence of operator	a. Election District	b. Village
4. Location of land	a. Election District	b. ED number
5. Certified by	Enumerator's signature	Date
6. Checked by	Supervisor's signature	Date

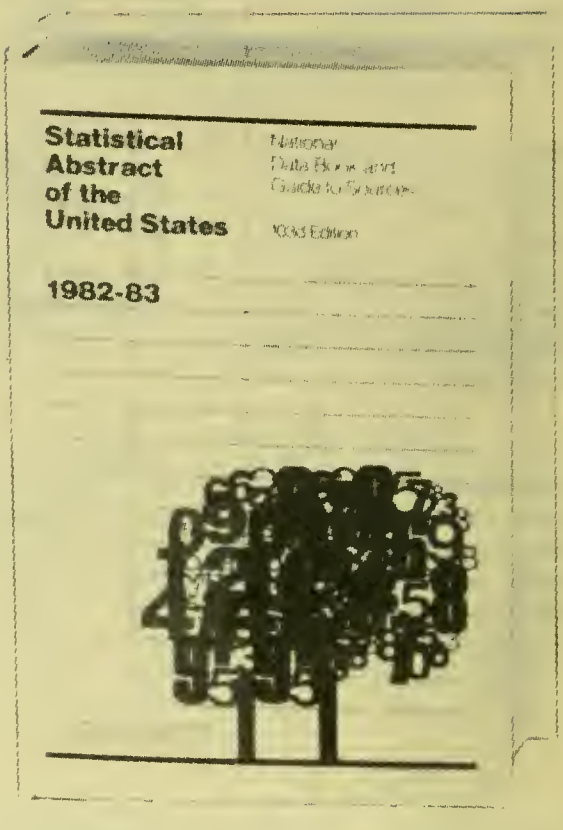
Where Do You Search for Information?

Here?

...or Here?



The Abstract eliminates a major source of frustration to data users... too many sources. No more running here and there in search of information... The Abstract puts it all at your fingertips.

- Over 1500 statistical tables
- More than 140 analytical charts
- A guide to hundreds of other sources.

ORDER FORM Send order form to Superintendent of Documents, U. S. Government Printing Office, Washington, D.C. 20402.

Please send me:

☐ Copies of **Statistical Abstract of the United States, 1982-83**

☐ paper $11 (S/N 003-024-05010-2)

PUBLICATION PROGRAM

Preliminary and final results of the 1982 Census of Agriculture are being published in a series of reports which provide data for each county and State and for the United States, Puerto Rico, Guam, and the Virgin Islands of the United States. The publications include statistics on number of farms; land in farms; farm and farm operator characteristics; livestock, poultry, and their products; crop production and value; selected expenditures; irrigation; and standard industrial classification of farms.

Publication order forms may be obtained from Customer Services Branch (Publications), Data User Services Division, Bureau of the Census, Washington, D.C. 20233, or from any U.S. Department of Commerce district office.

PRELIMINARY REPORTS (AC82-01(P) to -56(P)

Preliminary reports are published separately for each county in the United States with 10 farms or more, for each State, and for the United States. These reports contain data for all agricultural operations with $1,000 or more in actual or potential sales of agricultural products in the census year. The reports include data on number of farms, land in farms, size of farms, land use practices, farm operator characteristics, sales, expenditures, machinery and equipment, livestock, poultry, dairy products, and major crops harvested in the State.

FINAL REPORTS

Volume 1. Geographic Area Series (AC82-A-1 to -54)

State and County Data (A-1 to -50)—A separate report is presented showing detailed data for each State and the counties within. These reports include data on number and size of farms, tenure, age, and occupation of operators; types of organization; value of products sold; and standard industrial classification of farms.

Summary and State Data (A-51)—This report contains detailed data at the national and State levels.

Outlying Areas (A-52 to -54)—These reports present detailed data for each area and subdivision in Puerto Rico, Guam, and the Virgin Islands of the United States.

Volume 2. Subject Series (AC82-SS-1 to -3)

Graphic Summary (SS-1)—This report presents the Nation's agriculture graphically illustrated by dot and multicolor pattern maps. The maps provide displays on size and type of farm, land use, farm tenure, value of products sold, crops harvested, livestock inventories, and other characteristics of farms.

Coverage Evaluation (SS-2) —This report presents estimates of the completeness of the 1982 Census of Agriculture for the United States and geographic regions. It provides coverage estimates of farms, land, value of products, selected characteristics of missed farms, and sample reliability.

Procedural History (SS-3)—This report is a comprehensive summary of the planning, preparation, data collection, processing, and publication activities of the 1982 Census of Agriculture. It includes data collection forms and a list of key personnel.

MICROFICHE

Microfiche are available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Final County Reports—A final report for each county and State, with the same format and items as the published preliminary reports, is available on microfiche only.

Volume 1 Reports—Published Geographic Area Series data are also available on microfiche.

COMPUTER TAPES

Public-use computer tapes contain the same summary statistics that are found in the published preliminary reports and the county data from the volume 1 reports. Order forms may be obtained from the Customer Services Branch, Data User Services Division, Bureau of the Census, Washington, D.C. 20233 (telephone 301/763-4100). Upon request, special sets of tapes of the State data in volume 1 may be obtained from the Agriculture Division, Bureau of the Census, Washington, D.C. 20233.
